

WHAT IS CLAIMED IS:

1. An aerosol device comprising:

(a) a container containing a composition formed of a fluid and at least one propellant, and

(b) means for distributing the composition,

said device characterized in that:

(i) the composition comprises, in a cosmetically acceptable medium,

at least one polycondensate comprising at least one sequence chosen from polyurethanes and polyureas, and

an organic solvent, wherein the weight ratio of the propellant to the organic solvent is greater than or equal to 1:5:1; and

(ii) the device is suitable for giving an initial flow rate of aerosol composition of less than or equal to 0.75 gram per second.
